

## Coding Question Instructions

We have implemented the coding section of this project using Google Colab. Please navigate to the following link to access the dataset, the blank Colab notebooks, and the solutions:

<https://drive.google.com/drive/u/0/folders/1N0JSBAgoGtbzgx6p1Z1MIQuZb5Tph9U>.

The dataset is in the Colab folder as well called small. For you to run the Colab notebooks without any problems, please make sure to create a shortcut of the project folder to your Google Drive. This will allow us to mount to the Drive and use the dataset. These instructions are also listed in the blank Colab notebooks. Here is how to create a shortcut:

- 1) Right-click on the entire project folder called “GAN and WGAN Compare and Contrast Coding Question”
- 2) Select “Add shortcut to Drive”
- 3) Click the blue “Add Shortcut” button

Now, you can open the blank and solution notebooks and run all the code.
